IDENTIFIERS	Canada; Full Time Students; *Ontario

ABSTRACT

Summary statistics are presented for the fall of 1977 on application and registration patterns of applicants wishing to pursue full-time study in first-year places in Ontario universities. This is the fifth in a series of annual reports that began with admissions in the fall of 1973. Statistics deal only with applicants processed by the Application Centre who were applying for fall entry into full-time study in first year of post-year five programs. Tables provide numbers and percentage increases of applicants and registered applicants by program groupings, educational background, age and sex, area of geographic origin, and country of citizenship and immigration status. November, 1978

78-15

This report presents summary statistics on application and registration patterns of applicants wishing to pursue full-time study in first-year places in Ontario universities. This is the fifth in a series of annual reports which commenced with admissions in the fall of 1973.

To facilitate timely release of these statistics, no commentary has been included in the report. It is anticipated that a report analyzing trends in applications and registrations over the past five years will be published later this year.

* * * * * *

This report was prepared by the Research Division of the Council of Ontario Universities and by the Ontario Universities' Application Centre. Requests for further information should be directed to L.C. Payton, Research Division, Council of Ontario Universities.

Introduction

This report presents application and registration data for the fall of 1977. The presentation of the data is identical to that used in the 1976 report. Users are cautioned to read the limitations section of this report to be aware of any factors which might affect the comparability of data in this report, both to earlier reports in this series and to other reports which present registration statistics.

Definitions

For the purposes of this report, the definitions used by the Ontario Universities' Application Centre have been employed.

Year 5 applicants refer to those applicants who were registered during the 1976-77 academic year as full-time students in Year 5 of an Ontario secondary school. All other applicants were defined to be Regular applicants.

Each applicant was allowed to indicate up to three choices of universities and programmes. Each choice was considered to be a distinct application, even though the applicant submitted only one application form. Applicants also indicated their order of preference for their choices.

Throughout the admission cycle, applicants were permitted to amend their choices by dropping a choice and adding a different choice. Deleted choices are referred to as inactive choices or applications while current choices (up to the maximum of three) are called active choices. All of the tables in this report exclude inactive choices.

The Application Centre was responsible for processing all applications for first-year full-time applicants who were not previously registered at an Ontario university. When these applicants subsequently registered at a university, they were designated as registered applicants. If a student had been previously registered (i.e. repeater or internal transfer between programmes) at that institution, his application was not processed by the Centre. In order to obtain data on all students registered in first-year programmes on a full-time basis, universities were asked to supply data on these registrants. Included in these figures were those students who had applied for advanced standing above first year but had subsequently registered in first year. Where universities did not identify the classification of some of their registrants, these registrants were recorded as unidentified registrants.

Statistics presented in this report deal only with applicants processed by the Application Centre who are applying for fall entry into full-time study in first year of post-year 5 programmes. In addition to the exclusions listed in the previous paragraph, applicants seeking admission to preliminary year programmes or diploma programmes which do not require Year 5 for entry have been excluded. Table 15 presents a reconciliation of the various categories of registrants in first year.

General Limitations

As previously stated, the Application Centre was dependent on the universities for data on registrations. These data are particularly sensitive to the count date employed. In 1973, 1974 and 1975 the universities counted their registrants in late September for submission to the Application Centre in early October. Statistics submitted to MCU and Statistics Canada employed a December 1 count date. Commencing in 1976, all registrations statistics submitted to OUAC, MCU and Statistics Canada were based on a November 1 count date. However, the statistics reported may not agree because of differences in the

definitions of full-time employed for the different submissions.

Applicants were permitted up to three choices of universities and programmes on the application form. The one exception to this was in 1973 when regular applicants were required to submit a separate application form for each choice of programme and university, up to the maximum of three choices.

Specific Limitations

The decline in registered applicants shown in 1976-77 in Table 1 is misleading. Problems in the University of Toronto's student record system in 1975-76 resulted in a greater number of first-time registrants being reported to OUAC than should have been the case. Originally, Toronto had reported 7,088 first-time registrants and 62 repeaters and transfers, for a total of 7,150 first year registrants. Upon re-examination, Toronto concluded that the correct figures should have been 6,594 first-time registrants and 441 repeaters and transfers, for a total of 7,035 registrants in first year.

Incorporating these changes, Table 1 would read:

	Registered Applicants	% Increase
1973	32,359	
1974	33,664	4.0
1975	34,563	2.7
1976	34,603	0.1
1977	32,129	-7.1

Unfortunately it was not possible to amend the detailed records submitted to OUAC; the tables appearing in this report are derived using the original University of Toronto data.

TABLE 1
